# About QCU

The Quezon City University, formerly known as the Quezon City Polytechnic University, came into existence on March 1, 1994, by the City Council Ordinance No. SP-171. The institution was created to undertake skilled workers' training in response to the manpower requirement by industry and business establishments within the city. The organization of the Polytechnic as a local government educational institution included the old Skills and Training Center. The QCP established its reputation among local government units as a show window and model technology-based institution, paving the way for its recognition by the Technical Education Skills and Development Authority (TESDA) and developing a strong alliance with the Japanese International Cooperation Agency (JICA).

On August 20, 1997, the Polytechnic was enhanced into a University through City Council Ordinance No. SP-544, S-97. The leadership of former Quezon City Mayor Feliciano "Sonny" Belmonte saw meaningful access to higher education. Starting 2005-2006, the University has started offering degree programs. Initially, the courses are BS in Entrepreneurial Management, BS in Information Technology, and BS in Industrial Engineering. SP-1945, s. 2009, otherwise known as "An Ordinance Amending Ordinance No. SP1030, s. 2001 (or the QCPU Charter)", passed by the Quezon City Council, grants the Quezon City Polytechnic University semi-autonomy as to its fiscal management and control over its operations, budgeting and reporting requirements. Under the Ordinance SP-2308 s. 2014, the QC Council authorizes the University to offer the Senior High School Program as mandated by the Department of Education. In July 2019, the SP-2812 s.2019, or the "Ordinance converting the Quezon City Polytechnic University to Quezon City University and enhancing its charter" was fully implemented.

# Message of the President

**Theresita V. Atienza, DEM**  
*University President*

I am delighted to share with you the QCU Annual Report 2023, showcasing the highlights of our accomplishments in 2023 as we continue our journey toward excellence in quality education. The past year has been marked by significant milestones and accomplishments that reflect our unwavering commitment to academic excellence, innovation, and community engagement.

Our programs in Entrepreneurship, Industrial Engineering, Electronics Engineering, and Information Technology have been awarded Level II ALCUCOA. This recognition reaffirms our dedication to maintaining the highest standards of academic quality and ensuring that we provide world-class education in line with our vision to be recognized as the #1 local university of employable graduates.

Furthermore, we took part in various social responsibility projects such as the Be Your Own Boss (BYOB) and the offering of a BS Entrepreneurship degree to selected women Persons Deprived of Liberty (PDLs) in QC. These initiatives highlight our efforts to address critical societal issues through education, research, and capacity-building.

One of our BS Accountancy graduates achieved a remarkable Top 11 ranking in the October 2023 CPA Licensure Examination. In addition, we have had the privilege of hosting and participating in various events, such as the Youth Summit 2023, the APCORE-PIKSI Hybrid International Conference in Indonesia, the Association of Local Colleges and Universities (ALCU) Conference, and the Journalism Studies Association of the Philippines (JSAP) Conference.

I am also pleased to report that we are nearing the completion of the New Academic Building and Urban Farm Greenhouses. These state-of-the-art facilities will provide our students with enhanced learning environments and support our commitment to sustainability and innovation.

As we reflect on these achievements, let us reaffirm our commitment to excellence, innovation, and service to our community. Together, we will continue to uphold the values of academic excellence and social responsibility that define QCU.
